
GPT-OSS-120B | Probe trained only on C4 + Dolma3 single-message inputs
Selected SUCAT linear probe: mid-16+20+24, C=0.005 | Frozen MXFP4 model
Color = ORIGINAL message function (including in the two altered formats)
System
User
CoT
Assistant
Tool (no tool body in this case)
Native delimiters (Correct tags)
True roles: S / U / C / A; probe outputs all 5 roles
Everything in user tags
Formal role: all user; colors show ORIGINAL functions
No message delimiters (No tags)
Colors show ORIGINAL functions; no formal role labels

Original token position in serialized input (delimiter gaps retained)
Native accuracy: 690/915 = 75.41%
Original-function alignment only: 666/915 = 72.79%
No formal multiclass accuracy reported
Original-function alignment only: 680/915 = 74.32%
No formal multiclass accuracy reported
All 915 content tokens shown per format, including all 57 system tokens. Raw per-token probabilities: no smoothing or truncation.
Toolness is a real fifth output; this case has no tool body. Altered formats retain 6 join-LFs fused into message-final tokens.
