<|start|>system<|message|> the Health and Safety Executive in 2000. LEGIONNAIRE can also be used as a general sanitising cleaner on all other hard surfaces.
How to Use. Treating Legionella Bacteria: STEP 1: Use SCALE DOWN to remove any limescale or sediment buildup from showers, showerheads and air-conditioning systems. Keeping a water system free from li
mescale or sediment build-up will remove potential habitats for water stagnation and bacteria growth. For further info see: SCALE DOWN. STEP 2: Wipe down all hard surfaces with LEGIONNAIRE. This will
neutralise any acidic residue and kill any lingering bacteria activity. Dilute at the ratio of 1 part LEGIONNAIRE to 8 parts water. For example add 100 mls of LEGIONNAIRE to a 1 litre spray bottle, th
en add 800 mls of clean water. Finally rinse with clean water.
How to Use. General Sanitising: For the general sanitising/cleaning on all other hard surfaces, use at the same dilution rate as above, omitting STEP<|end|><|start|>developer<|message|>ising cleaner o
n all other hard surfaces.
