<|start|>system<|message|> Storm Callum on the 12th October. It was mild and unsettled for most of November with Storm Diana on the 28th. Atlantic westerlies dominated in December with Storm Deirdre o
n the 15th.
The first week of December was mild and unsettled with low-pressure systems and associated weather fronts traversing the country frequently in a mainly westerly airflow. This gave rain or showers ever
y day with windy conditions at times, especially on the 7th and 8th. The second week continued with the generally unsettled theme, although less active on the 9th and 10th, as a transient area of high
 pressure moved over the country. High pressure established itself over Scandinavia on the 12th and the airflow over Ireland backed to south or southeast up to the 15th. The bulk of the rain during th
is period fell in the South. On the 15th, Storm Deirdre deepened rapidly as it moved across the country giving widespread heavy rain and very strong winds. The remainder of the third week was Atlantic
 dominated again in a south or south-w<|end|><|start|>developer<|message|>Annual 2018 – Temperature and Sunshine above average in most places. Storm Emma brought widespread snow.
on the 19th followed by Storm Bronagh, and Storm Callum on the 12th October. It was mild and unsettled for most of November with Storm Diana on the 28th. Atlantic westerlies dominated in December with
