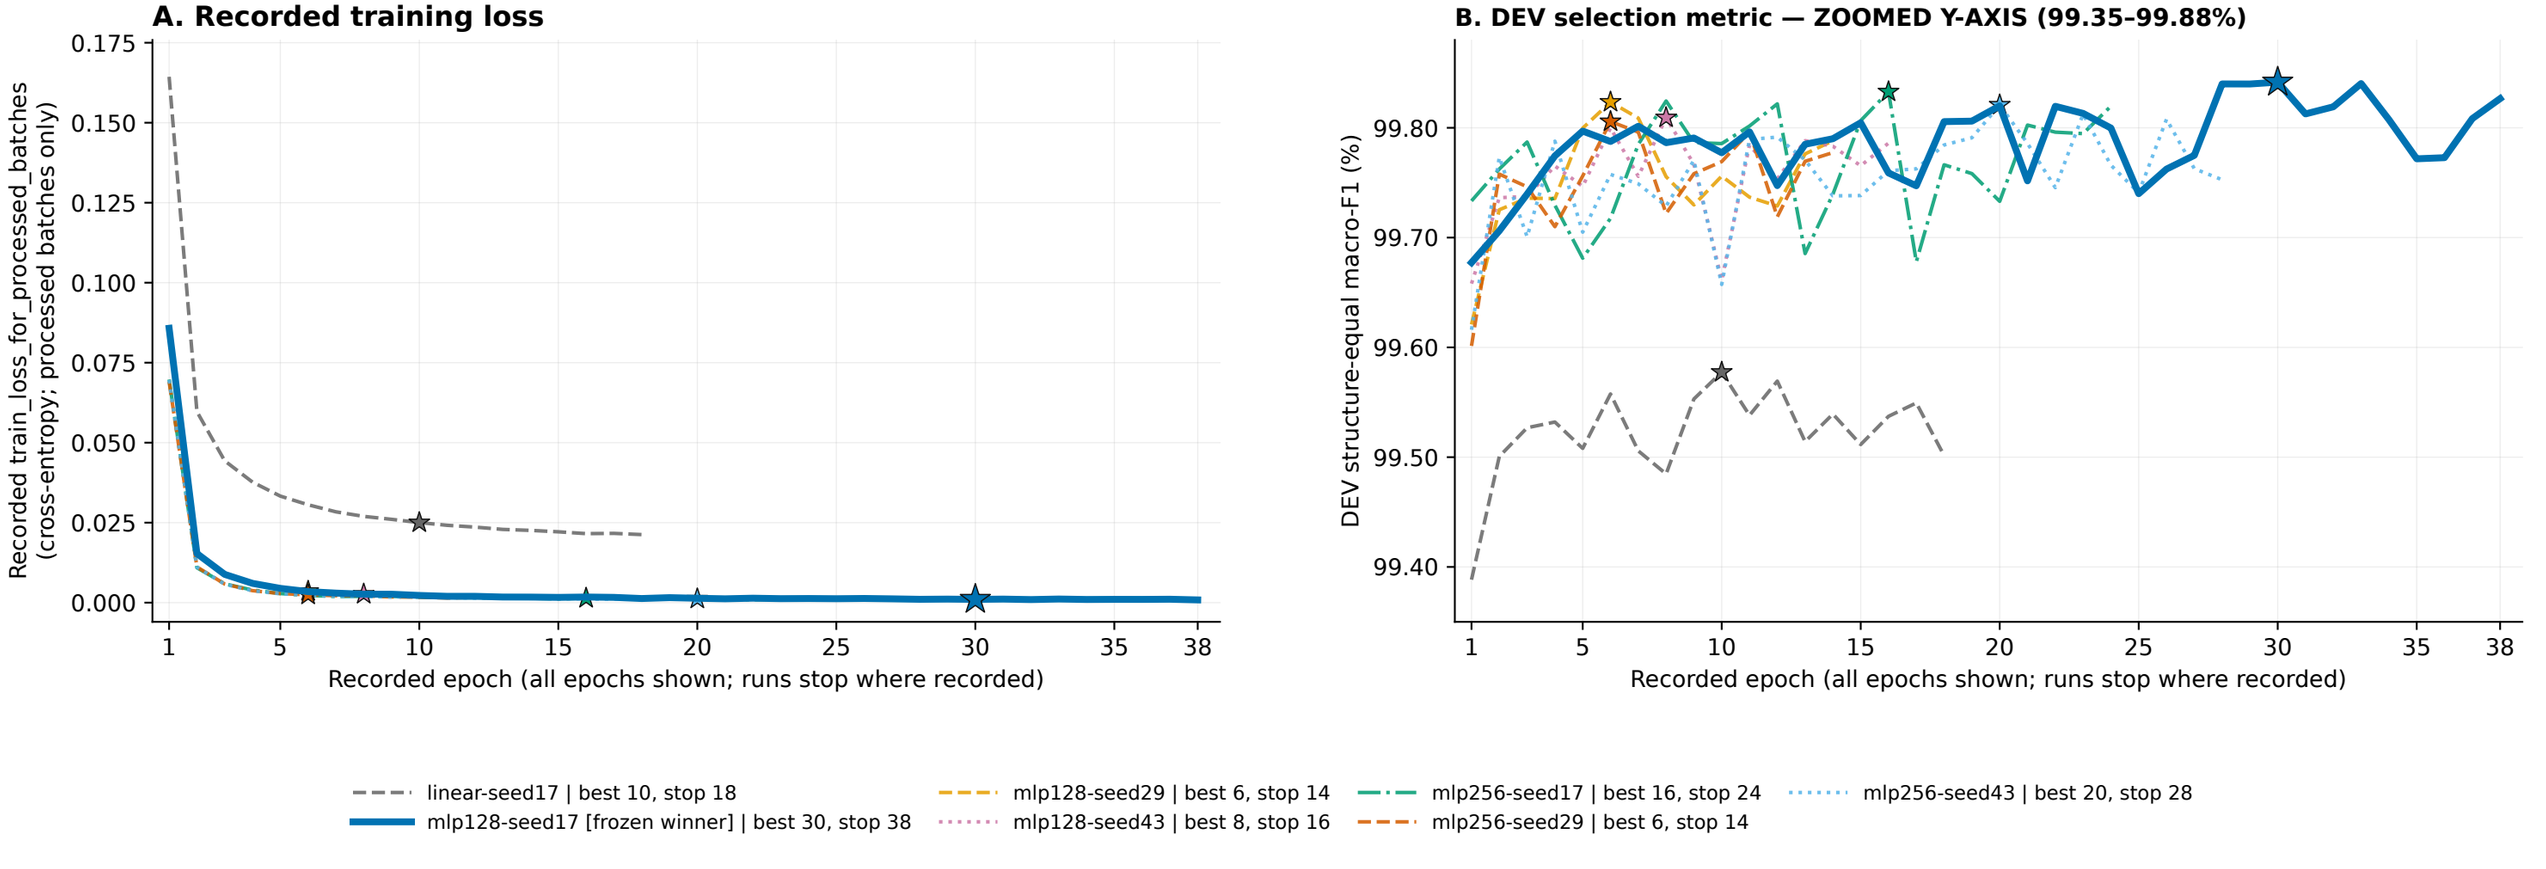
Formal training diagnostics | seven predeclared candidates

Fixed DEV-selected winner: mlp128-seed17 | Stars = recorded best_epoch | No TEST/external metrics used

Frozen winner export: recorded epoch 30; DEV structure-equal macro-F1 = 99.84158%



Loss is the recorded mean over batches processed in that process; it is not an empirical risk over unique FIT examples. Derived epoch scalars preserve original raw-history SHA provenance. The DEV ordinate is deliberately zoomed; selection is unchanged.
